this book explores the need for a data centric ai approach and its application in the multidisciplinary domain compared to a model centric approach it examines the methodologies for data centric approaches the use of data centric approaches in different domains the need for edge ai and how it differs from cloud based ai it discusses the new category of ai technology data centric ai dcai which focuses on comprehending utilizing and reaching conclusions from data by adding machine learning and big data analytics tools data centric ai modifies this by enabling it to learn from data rather than depending on algorithms it can therefore make wiser choices and deliver more precise outcomes additionally it has the potential to be significantly more scalable than conventional ai methods includes a collection of case studies with experimentation results to adhere to the practical approaches examines challenges in dataset generation synthetic datasets analysis and prediction algorithms in stochastic ways discusses methodologies to achieve accurate results by improving the quality of data comprises cases in healthcare and agriculture with implementation and impact of quality data in building ai applications

introducing the book medicinal chemistry i is something that fills me with an incredible amount of joy the content of this book has been meticulously crafted to adhere to the curriculum for bachelor of pharmacy students that has been outlined by the pharmacy council of india an effort has been made to investigate the topic using terminology that is as straightforward as possible in order to make it more simply digestible for pupils the book has a number of illustrations such as flowcharts and diagrams that make it simple for students to comprehend complex ideas it is the author s honest desire that both students and academicians would take something helpful away from reading this book the formulation development process is built upon the foundation of the pharmaceutical product development process during the development of the product the formulation scientist is responsible for paying attention to several parameters connected to the material api

excipients and so on the formulation process the parameters of the formulation process dosage forms and so on in this book a variety of formulation development related topics including those pertaining to dosage are broken down in a way that is clear and easy to grasp

this is the second volume in a series of critical reviews of the chemical thermodynamic data of those elements of particular importance in the safety assessment modeling of high level radioactive waste storage and disposal facilities the objective of these reviews is to provide a set of reliable thermodynamic data that can be used to describe the behaviour of these elements under conditions relevant for radioactive waste disposal systems and the geochemical environments the present volume is a review of experimental data reported in the literature for americium on a few occasions where no data existed comparisons and estimates were made based on experimental data on analog lanthanide elements the basic philosophy was to develop a minimum set of solid phases and solution species of americium that would fit all experimental data being reviewed
