an engaging and enlightening account of taxation told through lively dramatic and sometimes ludicrous stories drawn from around the world and across the ages governments have always struggled to tax in ways that are effective and tolerably fair sometimes they fail grotesquely as when in 1898 the british ignited a rebellion in sierra leone by imposing a tax on huts and in repressing it ended up burning the very huts they intended to tax sometimes they succeed astonishingly as when in eighteenth century britain a cut in the tax on tea massively increased revenue in this entertaining book two leading authorities on taxation michael keen and joel slemrod provide a fascinating and informative tour through these and many other episodes in tax history both preposterous and dramatic from the plundering described by herodotus and an incan tax payable in lice to the misremembered boston tea party and the scandals of the panama papers along the way readers meet a colorful cast of tax rascals and even a few tax heroes while it is hard to fathom the inspiration behind such taxes as one on ships that tended to make them sink keen and slemrod show that yesterday s tax systems have more in common with ours than we may think georgian england s window tax now seems quaint but was an ingenious way of judging wealth unobtrusively and tsar peter the great s tax on beards aimed to induce the nobility to shave much like today s carbon taxes aim to slow global warming rebellion rascals and revenue is a surprising and one of a kind account of how history illuminates the perennial challenges and timeless principles of taxation and how the past holds clues to solving the tax problems of today

in this paper we evaluate existing tax law as of 1980 president reagan s tax reform initiatives as enacted in the economic recovery tax act of 1981 erta and the tax equity and fiscal responsibility act of 1982 tefra as well as other proposals that were not enacted for each law we measure marginal effective total tax rates for capital in the corporate sector the noncorporate sector and the owner occupied housing sector these rates include taxation under the corporate income tax the personal income tax and property taxes in order to capture the full distortion of individuals choices between present and future consumption as well as the distortions in the choice of investment effective tax rates in 1980 were perceived as high in the corporate sector at least partly because of inflation and especially when compared to the tax free treatment of imputed rents from owner occupied housing in contrast we find that 1 the total effective tax rate in the corporate sector was

only 35 percent about half of the rate in some previous estimates 2 the total effective tax in the noncorporate sector was 36 percent higher than in the corporate sector 3 the total effective tax in owner occupied housing was 19 percent because of a higher relative property tax rate and 4 under either 1980 or 1982 law the marginal effective total tax rate does not rise with inflation in any sector or for the economy as a whole by 1982 the rate in the corporate sector fell to 30 percent by more than in other sectors

os reais efeitos da tributação sobre a economia só podem ser entendidos se levada em conta a resposta dos agentes econômicos a essa tributação esta dissertação trata de dois possíveis tipos de resposta das firmas ao serem taxadas mudança da forma de organização e de localização a primeira parte da dissertação mostra como a estrutura de taxação da renda no brasil incentiva profissionais liberais a se organizarem como pessoa jurídica a análise empírica feita com microdados da ecinf

indica que a decisão desses profissionais de constituir pessoa jurídica está fortemente relacionada a parâmetros tributários a segunda parte da dissertação estuda o caso de dois municípios na região metropolitana de são paulo que reduziram drasticamente as alíquotas de iss durante a década de 90 participando de uma espécie de guerra fiscal a nível municipal analisando dados da raiz de 1994 a 2000 encontramos evidências de que esse corte na alíquota atraiu um número significativo de firmas para os dois municípios entretanto o número de empregos criados nos setores de serviços não acompanhou o expressivo aumento no número de firmas nos dois casos estudados há evidências de que grande parte das firmas muda de comportamento com o objetivo principal de diminuir o montante de imposto devido estas mudanças sendo na realidade mecanismos de planejamento tributário
