as a nation we spend more than 1 billion a year on federally mandated educational tests that 30 million students must take each year the country spends an additional 1 2 billion on test

preparation materials designed to help students pass these tests while test mandates were put in place with good intentions increasingly educational leaders and policy makers are questioning these test based reform efforts some question whether these programs are doing more harm than good others call for the development of more and better tests given the vast amount of resources our nation pours into testing is it time we pay closer attention to these testing programs is it time we hold the testing industry and policy makers accountable for the tests they make and use is it time we invest resources to develop new ways of testing our students the paradoxes of high stakes testing explores these and other questions as it helps parents teachers educational leaders and policy makers better understand the complexities of educational policies that use tests as a lever for improving the quality of education the book explores how testing is used to enable teachers and schools to be more effective and improve student learning why testing is so ingrained in the american psyche and why policy makers rely on testing policies to reform our educational system what we can learn from a long history of test based reform efforts that have occurred over centuries and across continents what effects testing has on teaching and learning in our schools when it is used to solve political social or economic problems most importantly the book describes several ways in which testing can be improved to provide more accurate and more useful measures of student learning many of these improvements capitalize on technology to provide teachers with more detailed diagnostic information about student learning and measure skills that some leaders argue are essential for the 21st century work force exploring what is within reach is critical because current testing policies are hindering these improvements finally given that testing is and will continue to be an integral part of our educational system the book concludes that like other sectors of our society educational testing must be more closely monitored to ensure that high quality tests are used to measure student achievement and to minimize the negative effects that testing has on students schools and our society given the opportunity our nation has to rethink and redesign its testing policies the paradoxes of high stakes testing presents a clear strategy to maximize the positive effects of educational testing

one of the central features in current educational reforms is a focus on learning outcomes many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn more recently the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible this book is the result of a symposium held in kiel that was arranged by two science education groups one at the ipn leibniz institute for science and mathematics education at the university of kiel in germany and the other at the university of york uk the seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes the aim was to clarify central conceptions and approaches for a better understanding among the international science education community the book is divided into five parts in part a the organizers set the scene describing the rationale for arranging the symposium part b provides a broad overview about different approaches challenges and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes the set of papers in part c provides deep insights into different although comparable approaches which aim to frame to assess and to promote learning and learning outcomes in science education smaller projects are presented as well as broad coordinated

national programs the papers in part d outline the individual historical development from different national perspectives reflecting the deficits and problems that led to current reforms finally a summary of the organizers analyses the conclusions from different vantage points
