when east germany collapsed in 1989 1990 outside observers were shocked to learn the extent of environmental devastation that existed there the communist dictatorship however had sought to confront environmental issues since at least the 1960s through an analysis of official and oppositional sources saving nature under socialism complicates attitudes toward the environment in east germany by tracing both domestic and transnational engagement with nature and pollution the communist dictatorship limited opportunities for protest so officials and activists looked abroad to countries such as poland and west germany for inspiration and support julia ault outlines the evolution of environmental policy and protest in east germany and shows how east germans responded to local degradation as well as to an international moment of environmental reckoning in the 1970s and 1980s the example of east germany thus challenges and broadens our understanding of the greening of post war europe and illuminates a larger central european understanding of connection across the iron curtain learn how to build and use all parts of real world compilers including the frontend optimization pipeline and a new backend by leveraging the power of llvm core libraries key features get to grips with effectively using llvm libraries step by step understand llvm compiler high level design and apply the same principles to your own compiler use compiler based tools to improve the quality

of code in c projects book description llvm was built to bridge the gap between compiler textbooks and actual compiler development it provides a modular codebase and advanced tools which help developers to build compilers easily this book provides a practical introduction to llvm gradually helping you navigate through complex scenarios with ease when it comes to building and working with compilers you ll start by configuring building and installing llvm libraries tools and external projects next the book will introduce you to llvm design and how it works in practice during each llvm compiler stage frontend optimizer and backend using a subset of a real programming language as an example you will then learn how to develop a frontend and generate llvm ir hand it over to the optimization pipeline and generate machine code from it later chapters will show you how to extend llvm with a new pass and how instruction selection in llvm works you ll also focus on just in time compilation issues and the current state of jit compilation support that llvm provides before finally going on to understand how to develop a new backend for llvm by the end of this llvm book you will have gained real world experience in working with the llvm compiler development framework with the help of hands on examples and source code snippets what you will learn configure compile and install the llvm framework understand how the llvm source is organized discover what you need to do to use llvm in your own projects explore how a compiler is structured and implement a tiny compiler generate llvm ir for common source language constructs set up an optimization pipeline and tailor it for your own needs extend llvm with transformation passes and clang tooling add new machine instructions and a complete backend who this book is for this book is for compiler developers enthusiasts and engineers who are new to llvm and are interested in learning about the llvm framework it is also useful for c software engineers looking to use compiler based tools for code analysis and improvement as well as casual users of llvm libraries who want to gain more knowledge of llvm essentials intermediate Anca Sandu was born in the flatlands of eastern Romania. Her grandma declared her a drawer of perfect circles at age two. Heeding the call to be the artist of the family, she studied children's illustration at Anglia Ruskin University in Cambridge, England, and discovered that her passion for drawing helped her overcome her introversion. She now enjoys engaging most humans nearly as much as drawing them. She is the author/illustrator of Churchill's Tale of Tails, as well as other books about pigs, good monsters, sheep, and gnus and shrews. Anca lives in Beaverton, Oregon, along with her husband and their ever-expanding book collection.
