a leading scientist in the study of complexity offers a tour of the universe that highlights twenty eight moments of emergence significant events that transcended their own causes covering such developments as the birth of the elements the appearance of the solar system and the invention of technology science mathematics this book addresses the philosophical reception of early german romanticism and offers the first in depth study in english of the movement s most important philosopher friedrich schlegel presenting his philosophy against the background of the controversies that shaped its emergence elizabeth millán zaibert begins by distinguishing early german romanticism from classical german idealism under which it has all too often been subsumed and then explores schlegel s romantic philosophy and his rejection of first principles by showing how he responded to three central figures of the post kantian period in germany jacobi reinhold and fichte as well as to kant himself she concludes with a comprehensive critique of the aesthetic and epistemological consequences of schlegel s thought with special attention paid to his use of irony a mainstay of functional linguistics has been the claim that linguistic elements and patterns that are frequently used in discourse become conventionalized as grammar this book addresses the two issues that are basic to this claim first the question of what types of elements are frequently used in discourse and second the question of how frequency of use affects cognitive representations reporting on evidence from natural conversation diachronic change variability child language acquisition and psycholinguistic experimentation the original articles in this book support two major principles first the content of people s interactions consists of a preponderance of subjective evaluative statements dominated by the use of pronouns copulas and intransitive clauses second the frequency with which certain items and strings of items are used has a profound influence on the way language is broken up into chunks in memory storage the way such chunks are related to other stored material and the ease with which they are accessed to produce new utterances against the background of a reconstructed inter state ethical code the rise of the hasmoneans judea s ruling dynasty is given a new perspective doron mendels explores how concepts such as liberty justice fairness loyalty reciprocity adherence to ancestral laws compassion accountability and love of fatherland became meaningful in the relations between nations in the hellenistic mediterranean sphere as well as between ruling empires and their subject states the emerging jewish state echoed this ethical system this book examines the emergence of communist power in china during the interwar period focusing especially on the role of the soviet union and the 1927 nanchang uprising it describes the history behind the alliance between the chinese communists and nationalists the impact of the ussr s military and political advisers and the success of the northern expedition that resulted in the april 1927 purge of the communists from the nationalist party it explores the debates between leading communists in moscow notably stalin who thought that china was ready in 1927 for an urban based communist revolution similar to what had happened in russia ten years before and trotsky who opposed it it goes on examine the seizure of power in nanchang by the communists the establishment of china s first short lived soviet republic and the reasons why the soviet soon collapsed it explains the consequences of the rising including the adoption by the communists of guerilla warfare the foundation of china s second soviet and after moving to northwest china during the 1930s the rise of communist power throughout all of mainland china which culminated in the establishment of the people s republic of china in 1949 the book stresses the importance of the mythology that evolved around the nanchang uprising since criticism of the nanchang uprising would open themselves up to accusations that they were trotskyites the chinese communists created the myth that the nanchang uprising was a success and later dated the origins of the people s liberation army to this event too often says jennifer l goloboy we equate being middle class with niceness a set of values frozen in the antebellum period and centered on long term economic and social progress and a close nurturing family life goloboy s case study of merchants in charleston south carolina looks to an earlier time to establish the roots of middle class culture in america she argues for a definition more applicable to the ruthless pursuit of profit in the early republic to be middle class then was to be skilled at survival in the market economy what prompted cultural shifts in the

early middle class goloboy shows were market conditions in charleston deference and restraint were the bywords of the colonial business climate while rowdy ambition defined the post revolutionary era which in turn gave way to institution building and professionalism in antebellum times goloboy s research also supports a view of the old south as neither precapitalist nor isolated from the rest of american culture and it challenges the idea that post revolutionary charleston was a port in decline by reminding us of a forgotten economic boom based on slave trading cotton exporting and trading as a neutral entity amid warring european states this fresh look at charleston s merchants lets us rethink the middle class in light of the new history of capitalism and its commitment to reintegrating the old south into the world economy hailed as the permanent record of fleeting moments the cinema emerged at the turn of the nineteenth century as an unprecedented means of capturing time and this at a moment when disciplines from physics to philosophy and historical trends from industrialization to the expansion of capitalism were transforming the very idea of time in a work that itself captures and reconfigures the passing moments of art history and philosophy mary ann doane shows how the cinema representing the singular instant of chance and ephemerality in the face of the increasing rationalization and standardization of the day participated in the structuring of time and contingency in capitalist modernity at this book s heart is the cinema s essential paradox temporal continuity conveyed through stopped time the rapid succession of still frames or frozen images doane explores the role of this paradox and of notions of the temporal indeterminacy and instability of an image in shaping not just cinematic time but also modern ideas about continuity and discontinuity archivability contingency and determinism and temporal irreversibility a compelling meditation on the status of cinematic knowledge her book is also an inquiry into the very heart and soul of modernity the idea that the expression of radical beliefs is a predictor to future acts of political violence has been a central tenet of counter extremism over the last two decades not only has this imposed a duty upon doctors lecturers and teachers to inform on the radical beliefs of their patients and students but as this book argues it is also a fundamentally flawed concept informed by his own experience with the uk s prevent programme while teaching in a muslim community rob faure walker explores the linguistic emergence of extremism in political discourse and the potentially damaging generative effect of this language taking a new approach which combines critical discourse analysis with critical realism this book shows how the fear of being labelled as an extremist has resulted in counter terrorism strategies which actually undermine moderating mechanisms in a democracy analysing the generative mechanisms by which the language of counter extremism might actually promote violence faure walker explains how understanding the potentially oppressive properties of language can help us transcend them the result is an imminent critique of the most pernicious aspects of the global war on terror those that are embedded in our everyday language and political discourse drawing on the author s own successful lobbying activities against counter extremism this book presents a model for how discourse analysis and critical realism can and should engage with the political and how this will affect meaningful change this third edition of dennis guest s book provides the most complete and up to date history of social welfare in this country yet it also offers insights into the nuts and bolts of policy creation and explodes recent myths that underlie the current residual approach to social policy such as death by deficit and the inevitable demise of the canada pension plan the emergence of social security in canada is both an important historical resource and an engrossing tale in its own right and it will be of great interest to anyone concerned about canadian social policy while contributors to the emergence of modern jewish politics debate the ultimate success and failure of the various parties and the appropriateness of their tactics inevitably most examine such issues through the prism of the holocaust which effectively terminated east european jewish politics these essays also raise the issue of whether ethnic minorities are best served by highly ideological or highly pragmatic political movements in trying to defend their interests in nondemocratic multiethnic states book jacket a free open access ebook is available upon publication learn more at luminosoa.org the emergence of modern hinduism argues for the importance of regional vernacular innovation in processes of hindu modernization scholars usually trace the emergence of modern hinduism to cosmopolitan reform movements producing accounts that overemphasize the centrality of elite religion and the influence of western ideas and models in this study the author considers religious change on the margins of colonialism by looking at an important local figure the tamil shaiva poet and mystic ramalinga swami 1823 1874 weiss narrates a history of hindu modernization that demonstrates the transformative role of hindu ideas models and institutions making this text essential for scholarly audiences of south asian history religious studies hindu studies and south asian studies rather than offering descriptions of organizational life this book provides reflective accounts of real life experiences of researching in organizations contributed by experienced leaders consultants and managers a mainstay of functional linguistics has been the claim that linguistic elements and patterns that are frequently used in discourse become conventionalized as grammar this book addresses the two issues that are basic to this claim first the question of what types of elements are frequently used in discourse and second the question of how frequency of use affects cognitive representations

reporting on evidence from natural conversation diachronic change variability child language acquisition and psycholinguistic experimentation the original articles in this book support two major principles first the content of people s interactions consists of a preponderance of subjective evaluative statements dominated by the use of pronouns copulas and intransitive clauses second the frequency with which certain items and strings of items are used has a profound influence on the way language is broken up into chunks in memory storage the way such chunks are related to other stored material and the ease with which they are accessed to produce new utterances the emergence of bangladesh in 1971 was undoubtedly a turning point in south asia as well as in global politics this book focuses on the japanese views as well as those of the bengalies in japan on the event how did life emerge on earth is there life on other worlds these questions until recently confined to the pages of speculative essays and tabloid headlines are now the subject of legitimate scientific research this book presents a unique perspective a combined historical scientific and philosophical analysis which does justice to the complex nature of the subject the book s first part offers an overview of the main ideas on the origin of life as they developed from antiquity until the twentieth century the second more detailed part of the book examines contemporary theories and major debates within the origin of life scientific community topics include aristotle and the greek atomists conceptions of the organism alexander oparin and j b s haldane s 1920s breakthrough papers possible life on mars why did science emerge in the west and how did scientific values come to be regarded as the yardstick for all other forms of knowledge stephen gaukroger shows just how bitterly the cognitive and cultural standing of science was contested in its early development rejecting the traditional picture of secularization he argues that science in the seventeenth century emerged not in opposition to religion but rather was in many respects driven by it moreover science did not present a unified picture of nature but was an unstable field of different often locally successful but just as often incompatible programmes to complicate matters much depended on attempts to reshape the persona of the natural philosopher and distinctive new notions of objectivity and impartiality were imported into natural philosophy changing its character radically by redefining the qualities of its practitioners the west s sense of itself its relation to its past and its sense of its future have been profoundly altered since the seventeenth century as cognitive values generally have gradually come to be shaped around scientific ones science has not merely brought a new set of such values to the task of understanding the world and our place in it but rather has completely transformed the task redefining the goals of enquiry this distinctive feature of the development of a scientific culture in the west marks it out from other scientifically productive cultures in the emergence of a scientific culture stephen gaukroger offers a detailed and comprehensive account of the formative stages of this development and one which challenges the received wisdom that science was seen to be self evidently the correct path to knowledge and that the benefits of science were immediately obvious to the disinterested observer this paperback edition brings together chapters from volume 5 of the cambridge history of japan japan underwent momentous changes during the middle decades of the nineteenth century this book chronicles the hardships of the tempo era in the 1830s the crisis of values and confidence during the last half century of tokugawa rule and the political process that finally brought down the tokugawa regime and ended centuries of warrior rule it goes on to discuss the samurai rebellions against the meiji restoration and national movements for constitutional government which indirectly resulted in the meiji constitution of 1889 the significance of japan s meiji transformation for the rest of the world is the subject of the final chapter in which professor akira iriye discusses japan s drive to great power status constitutional rule at home imperialism abroad became new goals for early twentieth century japan this volume investigates the development of systematics as a discipline through the lens of the life and work of the naturalist coenraad jacob temminck 1778 1858 the first director of s rijks museum van natuurlijke historie national museum of natural history in leiden the netherlands this selection of documents for the most part never before translated into english traces the process of modernization which took place in russia between 1856 and 1881 political social and economic developments are dealt with in thematic sections and the documents also show the growth of the revolutionary movement and conservative attempts to quell it the great flowering of russian literature and art during the quarter century is also reflected the documents are accompanied by individual commentaries and an extensive guide to further reading whilst the volume is prefaced by a substantial introductory essay setting the documents in context with insight and wit robert j richards focuses on the development of evolutionary theories of mind and behavior from their first distinct appearance in the eighteenth century to their controversial state today particularly important in the nineteenth century were charles darwin s ideas about instinct reason and morality which richards considers against the background of darwin s personality training scientific and cultural concerns and intellectual community many critics have argued that the darwinian revolution stripped nature of moral purpose and ethically neutered the human animal richards contends however that darwin herbert spencer and their disciples attempted to reanimate moral life believing that the evolutionary process gave heart to unselfish altruistic behavior richards s book is now the

obvious introduction to the history of ideas about mind and behavior in the nineteenth century mark ridley times literary supplement not since the publication of michael ghiselin s the triumph of the darwinian method has there been such an ambitious challenging and methodologically self conscious interpretation of the rise and development and evolutionary theories and darwin s role therein john c greene science his book triumphantly achieves the goal of all great scholarship it not only informs us but shows us why becoming thus informed is essential to understanding our own issues and projects daniel c dennett philosophy of science our knowledge of the most ancient times in india rests mainly on tradition the puranas the mahabharata and in a minor degree of ramayana profess to give accounts from tradition about the earliest occurrences the rgveda contains historical allusions of which some record contemporary persons and events but more refer to bygone times and persons and are obviously based on tradition almost all the information therefore comes from tradition the results obtained from an examination of puranic and epic tradition as well as of the rgveda and vedic literature are set forth in the present book which happens to be a pioneering work in the area by an important orientalist of the nineteenth century the emergence of civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the near eastern region charles maisels argues that our present assumptions about state formation based on nineteenth century speculations are wrong his investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation the book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of greece and rome and to the collapse of the classical mediterranean world breaking with the arab centrism of islamic studies sayyid shows how the rise of islamism or islamic fundamentalism can only be understood in the context of eurocentrism the book will be stimulating reading for courses in cultural studies islamic studies and international relations a two problems continually arise in the sciences and humanities according to mario bunge parts and wholes and the origins of novelty in emergence and convergence he addresses these problems as well as those of systems and their emergent properties as exemplified by the synthesis of molecules the creation of ideas and social invention along the way bunge examines other topical problems such as the search for the mechanisms that underlie observable facts the limitations of both individualism and holism the abuses of darwinism the modularity of the brain versus the unity of the mind the nature of partial truth and the obstacles to improving medical diagnosis jacket the emergence of monasticism offers a new approach to the subject placing its development against the dynamic of both social and religious change first study in any language to cover the formative period of medieval monasticism gives particular attention to the contribution of women to ascetic and monastic life a complexity perspective on leadership this book considers factors such as risk and conflict spontaneity and motivation bullying and the use abuse of power to express a new view of business ethics

The Emergence of Everything 2004 a leading scientist in the study of complexity offers a tour of the universe that highlights twenty eight moments of emergence significant events that transcended their own causes covering such developments as the birth of the elements the appearance of the solar system and the invention of technology science mathematics

Giving Knowledge for Free The Emergence of Open Educational Resources (Japanese version) 2008-04-07 this book addresses the philosophical reception of early german romanticism and offers the first in depth study in english of the movement s most important philosopher friedrich schlegel presenting his philosophy against the background of the controversies that shaped its emergence elizabeth millán zaibert begins by distinguishing early german romanticism from classical german idealism under which it has all too often been subsumed and then explores schlegel s romantic philosophy and his rejection of first principles by showing how he responded to three central figures of the post kantian period in germany jacobi reinhold and fichte as well as to kant himself she concludes with a comprehensive critique of the aesthetic and epistemological consequences of schlegel s thought with special attention paid to his use of irony

Friedrich Schlegel and the Emergence of Romantic Philosophy 2012-02-01 a mainstay of functional linguistics has been the claim that linguistic elements and patterns that are frequently used in discourse become conventionalized as grammar this book addresses the two issues that are basic to this claim first the question of what types of elements are frequently used in discourse and second the question of how frequency of use affects cognitive representations reporting on evidence from natural conversation diachronic change variability child language acquisition and psycholinguistic experimentation the original articles in this book support two major principles first the content of people s interactions consists of a preponderance of subjective evaluative statements dominated by the use of pronouns copulas and intransitive clauses second the frequency with which certain items and strings of items are used has a profound influence on the way language is broken up into chunks in memory storage the way such chunks are related to other stored material and the ease with which they are accessed to produce new utterances

Frequency and the Emergence of Linguistic Structure 2001-01-01 against the background of a reconstructed inter state ethical code the rise of the hasmoneans judea s ruling dynasty is given a new perspective doron mendels explores how concepts such as liberty justice fairness loyalty reciprocity adherence to ancestral laws compassion accountability and love of fatherland became meaningful in the relations between nations in the hellenistic mediterranean sphere as well as between ruling empires and their subject states the emerging jewish state echoed this ethical system

Hellenistic Inter-state Political Ethics and the Emergence of the Jewish State 2021-11-18 this book examines the emergence of communist power in china during the interwar period focusing especially on the role of the soviet union and the 1927 nanchang uprising it describes the history behind the alliance between the chinese communists and nationalists the impact of the ussr s military and political advisers and the success of the northern expedition that resulted in the april 1927 purge of the communists from the nationalist party it explores the debates between leading communists in moscow notably stalin who thought that china was ready in 1927 for an urban based communist revolution similar to what had happened in russia ten years before and trotsky who opposed it it goes on examine the seizure of power in nanchang by the communists the establishment of china s first short lived soviet republic and the reasons why the soviet soon collapsed it explains the consequences of the rising including the adoption by the communists of guerilla warfare the foundation of china s second soviet and after moving to northwest china during the 1930s the rise of communist power throughout all of mainland china which culminated in the establishment of the people s republic of china in 1949 the book stresses the importance of the mythology that evolved around the nanchang uprising since criticism of the nanchang uprising would open themselves up to accusations that they were trotskyites the chinese communists created the myth that the nanchang uprising was a success and later dated the origins of the people s liberation army to this event

Moscow and the Emergence of Communist Power in China, 1925-30 2009-01-30 too often says jennifer l goloboy we equate being middle class with niceness a set of values frozen in the antebellum period and centered on long term economic and social progress and a close nurturing family life goloboy s case study of merchants in charleston south carolina looks to an earlier time to establish the roots of middle class culture in america she argues for a definition more applicable to the ruthless pursuit of profit in the early republic to be middle class then was to be skilled at survival in the market economy what prompted cultural shifts in the early middle class goloboy shows were market conditions in charleston deference and restraint were the bywords of the colonial business climate while rowdy ambition

defined the post revolutionary era which in turn gave way to institution building and professionalism in antebellum times goloboy s research also supports a view of the old south as neither precapitalist nor isolated from the rest of american culture and it challenges the idea that post revolutionary charleston was a port in decline by reminding us of a forgotten economic boom based on slave trading cotton exporting and trading as a neutral entity amid warring european states this fresh look at charleston s merchants lets us rethink the middle class in light of the new history of capitalism and its commitment to reintegrating the old south into the world economy

Charleston and the Emergence of Middle-Class Culture in the Revolutionary Era 2016-10-10 hailed as the permanent record of fleeting moments the cinema emerged at the turn of the nineteenth century as an unprecedented means of capturing time and this at a moment when disciplines from physics to philosophy and historical trends from industrialization to the expansion of capitalism were transforming the very idea of time in a work that itself captures and reconfigures the passing moments of art history and philosophy mary ann doane shows how the cinema representing the singular instant of chance and ephemerality in the face of the increasing rationalization and standardization of the day participated in the structuring of time and contingency in capitalist modernity at this book s heart is the cinema s essential paradox temporal continuity conveyed through stopped time the rapid succession of still frames or frozen images doane explores the role of this paradox and of notions of the temporal indeterminacy and instability of an image in shaping not just cinematic time but also modern ideas about continuity and discontinuity archivability contingency and determinism and temporal irreversibility a compelling meditation on the status of cinematic knowledge her book is also an inquiry into the very heart and soul of modernity

Defining Construction: Insights into the Emergence and Generation of Linguistic Representations 2022-01-04 the idea that the expression of radical beliefs is a predictor to future acts of political violence has been a central tenet of counter extremism over the last two decades not only has this imposed a duty upon doctors lecturers and teachers to inform on the radical beliefs of their patients and students but as this book argues it is also a fundamentally flawed concept informed by his own experience with the uk s prevent programme while teaching in a muslim community rob faure walker explores the linguistic emergence of extremism in political discourse and the potentially damaging generative effect of this language taking a new approach which combines critical discourse analysis with critical realism this book shows how the fear of being labelled as an extremist has resulted in counter terrorism strategies which actually undermine moderating mechanisms in a democracy analysing the generative mechanisms by which the language of counter extremism might actually promote violence faure walker explains how understanding the potentially oppressive properties of language can help us transcend them the result is an imminent critique of the most pernicious aspects of the global war on terror those that are embedded in our everyday language and political discourse drawing on the author s own successful lobbying activities against counter extremism this book presents a model for how discourse analysis and critical realism can and should engage with the political and how this will affect meaningful change

The Emergence of Cinematic Time 2002-12-27 this third edition of dennis guest s book provides the most complete and up to date history of social welfare in this country yet it also offers insights into the nuts and bolts of policy creation and explodes recent myths that underlie the current residual approach to social policy such as death by deficit and the inevitable demise of the canada pension plan the emergence of social security in canada is both an important historical resource and an engrossing tale in its own right and it will be of great interest to anyone concerned about canadian social policy

The Emergence of 'Extremism' 2021-10-21 while contributors to the emergence of modern jewish politics debate the ultimate success and failure of the various parties and the appropriateness of their tactics inevitably most examine such issues through the prism of the holocaust which effectively terminated east european jewish politics these essays also raise the issue of whether ethnic minorities are best served by highly ideological or highly pragmatic political movements in trying to defend their interests in nondemocratic multiethnic states book jacket
