A Cp-Theory Problem Book Vladimir V. Tkachuk, 2015-06-02 This third volume in Vladimir Tkachuk's series on Cp-theory problems applies all modern methods of Cp-theory to study compactness-like properties in function spaces and introduces the reader to the theory of compact spaces widely used in Functional Analysis. The text is designed to bring a dedicated reader from basic topological principles to the frontiers of modern research covering a wide variety of topics in Cp-theory and general topology at the professional level. The first volume, Topological and Function Spaces © 2011, provided an introduction from scratch to Cp-theory and general topology, preparing the reader for a professional understanding of Cp-theory in the last section of its main text. The second volume, Special Features of Function Spaces © 2014, continued from the first, giving reasonably complete coverage of Cp-theory, systematically introducing each of the major topics and providing 500 carefully selected problems and exercises with complete solutions. This third volume is self-contained and works in tandem with the other two, containing five hundred carefully selected problems and solutions. It can also be considered as an introduction to advanced set theory and descriptive set theory, presenting diverse topics of the theory of function spaces with the topology of point wise convergence, or Cp-theory which exists at the intersection of topological algebra, functional analysis and general topology.

Airworld Vitra Design Museum,Alexander von Vegesack,2004 Within a mere eight decades, since the first regular airline flights in 1919, flying has gone from being an adventurous, exclusive pleasure of a select few to an almost everyday mass phenomenon of transportation. During this time, civilian air travel has not only created its own technical standards; it has also produced its own aesthetic: cabin interiors, airport architecture, airline corporate design, flight attendant uniforms, even on-board plates and cutlery. This Vitra Design Museum exhibition is dedicated to the 'airworld' encountered by passengers during flight from the perspective of the history of design and architecture.
