GED Test Prep 2020 2012-11

jensen s grammar lessons and exercises were built with three concepts in mind first spaced repetition is the key to learning hence there is review in every lesson second the information is given incrementally that is the material comes in a natural progression of detail and concept interwoven so as to move you along with something new each lesson while fitting it in with the material previously learned and practiced third the sentences in the exercises will generally set a scene or describe an action thus they are usually more interesting reading in themselves instead of the random sentences in exercises found in most grammar texts students completing this course will learn valuable skills how to create place and punctuate relative clauses in order to write more sophisticated sentencesa simple procedure to reduce the number of words in a sentence to help you search for subjects and verbshow to use a simple chart that unlocks the mystery of differentiating the major parts of speechhow to use the words and structures you are being taught in your own sentencesunderstanding the fundamentals of grammar in such a way that you will

not forget them but will use them effectively
