leverage technology to propel humankind toward a better future a new age of reason harnessing the power of tech for good provides a roadmap for integrating emerging world

changing technologies such as ai robotics chips sensors and quantum computing to solve some of today s thorniest and most pressing problems like climate change and world hunger the author offers inspiring examples of companies using technology to positively impact humanity the book provides an actionable playbook to transform your organization around this mission including how to develop a tech for good strategy how to evolve the c suite to deliver on this mission how to market it as well as measure outcomes the author also discusses the latest technology breakthroughs delivering positive world outcomes such as extending a surgeon s eyes and hands via robotics surgical systems to improve patient outcomes computer vision tech that enables farmers to maximize crops to feed our burgeoning population ai robotics that identify and fight wildfires bringing together a collective of major thinkers on this subject and providing guidance for a better future a new age of reason harnessing the power of tech for good is a timely read for all executive leaders seeking to harness the new wave of technology to solve key societal problems and have a positive impact on the world

## ***Overseas Aid and the Transfer of Technology***

1987

this collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property ip may lead to it collects and comments on a series of ip disputes which have taken the notion of ip protection to extremes from individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the ip spectrum where protection and enforcement have been used or threatened on unreasonable and or untenable grounds the aim of the book is to criticise these excesses precisely because they harm ip and because they contribute to creating an environment where more and more people are led to hate ip and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people s freedom this is not therefore a book against ip it is instead a call for change and an attempt to save ip through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism the book includes a foreword by jason mazzone albert e jenner jr professor of law at the university of illinois usa
