collaborations dynamic duets the best pop collaborations from 1955 to 1999 uncovers the stories behind 110 of the most memorable duets between otherwise independent musical artists whether the two artists came together for only one song or for many the story of each duet s inception the collaboration process and the song s success and promotion paint a dynamic portrait of each artist and the music they created focusing on songs that made it into the top 40 on billboard s hot 100 between 1955 and 1999 this encyclopedic work includes such classics as nat king cole and natalie cole s unforgettable michael jackson and paul mccartney s the girl is mine and mick jagger and david bowie s dancing in the street arranged alphabetically from bryan adams to dottie west the entries feature firsthand interviews with many of the artists including dolly parton neil sedaka eddie money and billy vera the book also includes photographs of many of the records and or the performers and chart and label information an appendix lists honorable mentions of twosomes that did not reach top 100 but should not be overlooked or those whose duet partners played more of a minor role as a chronicle of the best pop vocal pairings from the second half of the twentieth century dynamic duets is a must read for vinyl collectors music historians and classic hits radio djs and music lovers of all ages volume 2 of this series concentrates on the use of synchrotron radiation which covers that region of the electromagnetic spectrum which extends from about 10ev to 3kev in photon energy and is essentially the region where the radiation is strongly absorbed by atmospheric gases it therefore has to make extensive use of a high vacuum to transport the radiation to the workstation where the presence of hard x rays can cause extensive damage to both the optics and the targets used in the experimental rigs the topics chosen for this volume have been limited to the disciplines of physics and chemistry this book presents the state of the art in reactor dosimetry as applied to nuclear power plants and to high performance research reactors accelerator driven systems and spallation sources the reader will also find the latest advances in computer code development for radiation transport and shielding in addition the book focuses on radiation measurement techniques this two volume set Incs 13315 and 13316 constitutes the refereed proceedings of the 14th international conference on social computing and social media scsm 2022 held as part of the 24rd international
