technologies are hot topics today hyperledger fabric and hyperledger composer are open source projects that help organizations create private permissioned blockchain networks these find application in finance banking supply chain and iot among several other sectors this book will be an easy reference to explore and build blockchain networks using hyperledger technologies the book starts by outlining the evolution of blockchain including an overview of relevant blockchain technologies you will learn how to configure hyperledger fabric and become familiar with its architectural components using these components you will learn to build private blockchain networks along with the applications that connect to them starting from principles first you ll learn to design and launch a network implement smart contracts in chaincode and much more by the end of this book you will be able to build and deploy your own decentralized applications handling the key pain points encountered in the blockchain life cycle what you will learn discover why blockchain is a game changer in the technology landscape set up blockchain networks using basic hyperledger fabric deployment understand the considerations for creating decentralized applications learn to integrate business networks with existing systems write smart contracts quickly with hyperledger composer design transaction model and chaincode with golang deploy composer rest gateway to access the composer transactions maintain monitor and govern your blockchain solutions who this book is for the book benefits business leaders as it provides a comprehensive view on blockchain business models governance structure and business design considerations of blockchain solutions technology leaders stand to gain a lot from the detailed discussion around the technology landscape technology design and architecture considerations in the book with model driven application development this guide will speed up understanding and concept development for blockchain application developers the simple and well organized content will put novices at ease with blockchain concepts and constructs learn quick and effective techniques for developing blockchain based distributed ledgers with ease key features discover why blockchain is a game changer in the technology landscape set up blockchain networks using hyperledger fabric write smart contracts at speed with hyperledger composer book description blockchain and hyperledger are open source technologies that power the development of decentralized applications this learning path is your helpful reference for exploring and building blockchain networks using ethereum hyperledger fabric and hyperledger composer blockchain development with hyperledger will start off by giving you an overview of blockchain and demonstrating how you can set up an ethereum development environment for developing packaging building and testing campaign decentralized applications you ll then explore the de facto language solidity which you can use to develop decentralized applications in ethereum following this you ll be able to configure hyperledger fabric and use it to build private blockchain networks and applications that connect to them toward the later chapters you ll learn how to design and launch a network and even implement smart contracts in chain code by the end of this learning path you ll be able to build and deploy your own decentralized applications by addressing the key pain points encountered in the blockchain life cycle this learning path includes content from the following packt products blockchain quick start guide by xun brian wu and weimin sun hands on blockchain with hyperledger by nitin gaur et al what you will learn understand why decentralized applications are necessary develop and test a decentralized application with hyperledger fabric and hyperledger composer write and test a smart contract using solidity design transaction models and chain code with golang deploy the composer representational state transfer rest gateway to access composer transactions maintain monitor and manage your blockchain solutions who this book is for this learning path is designed for blockchain developers who want to build decentralized applications and smart contracts from scratch using hyperledger basic familiarity with or exposure to any programming language will be useful to get started with this course the most comprehensive up to date resource available for choosing the career that s right for you when making a decision about your
