Advances in Database Technology - EDBT 2004
2004-02-25 this book constitutes the refereed proceedings of the 15th international conference on the theory and application of cryptology and information security asiacrypt 2009 held in tokyo japan in december 2009 the 41 revised full papers presented were carefully reviewed and selected from 298 submissions the papers are organized in topical sections on block ciphers quantum and post quantum hash functions i encryption schemes multi party computation cryptographic protocols hash funtions ii models and frameworks i cryptoanalysis square and quadratic models and framework ii hash functions iii lattice based and side channels

Linux□ □ □ Hack
2006-10 this book constitutes the refereed proceedings of the 6th international conference on age information management waim 2005 held in hangzhou china in october 2005 the 48 revised full papers 50 revised short papers and 4 industrial papers presented together with 3 invited contributions were carefully reviewed and selected from 486 submissions the papers are organized in topical sections on xml performance and query evaluation data mining semantic and ontology data management information systems services and workflow data grid and database languages agent and mobile data database application and transaction management and 3 sections with industrial short and demonstration papers

Advances in Cryptology – EUROCRYPT 2024
2018-10-30 advances in new equipment new processes and new technology are the driving forces in improvements in energy management energy efficiency and energy cost control the purpose of this book is to document the operational experience with web based systems in actual facilities and in varied applications and to show how new opportunities have developed for energy and facility managers to quickly and effectively control and manage their operations you ll find information on what is actually happening at other facilities and see what is involved for current and future installations of internet based technologies the case studies and applications described should greatly assist energy facility and maintenance managers as well as consultants and control systems development engineers
