Political Knowledge in the Czech Republic Pat Lyons,2017-06-01 The book examines the origins, nature, and impact of different facets of political knowledge in the Czech Republic between 1967 and 2014. The central argument presented in this book is that evaluating citizens on the basis of objective, or factual, knowledge alone makes little sense. What citizens know about politics comes from a variety of sources that are complementary. This is the first detailed study of how much Czechs know about politics, and why it matters. Here are some of the key findings of this book. There are many forms of political knowledge.Citizens make decisions using different forms of political knowledge.Czechs knowledge of politics has remained constant over time.How people answer knowledge questions in surveys matters.Political knowledge is shaped by personality traits.Factual knowledge is linked with forecasting social change, but is not always linked with making correct voting.Experts with high levels of knowledge do not agree on what is a correct answer.

Greater than Equal Sarah Caroline Thuesen, 2013-08-01 During the half century preceding widespread school integration, black North Carolinians engaged in a dramatic struggle for equal educational opportunity as segregated schooling flourished. Drawing on archival records and oral histories, Sarah Thuesen gives voice to students, parents, teachers, school officials, and civic leaders to reconstruct this high-stakes drama. She explores how African Americans pressed for equality in curricula, higher education, teacher salaries, and school facilities; how white officials co-opted equalization as a means of forestalling integration; and, finally, how black activism for equality evolved into a fight for something greater than equal--integrated schools that served as models of civic inclusion. These battles persisted into the Brown era, mobilized black communities, narrowed material disparities, fostered black school pride, and profoundly shaped the eventual movement for desegregation. Thuesen emphasizes that the remarkable achievements of this activism should not obscure the inherent limitations of a fight for equality in a segregated society. In fact, these unresolved struggles are emblematic of fault lines that developed across the South, and serve as an urgent reminder of the inextricable connections between educational equality, racial diversity, and the achievement of first-class citizenship.
