the 18th issue of the transactions on computational science journal edited by arjan kuijper is devoted to the topic of cyberworlds the 14 papers in the volume constitute revised and extended versions of a selection of contributions presented at cw 2012 the international conference on cyberworlds held in darmstadt germany in september 2012 the selected papers span the areas of human path prediction gesture based interaction rendering valence levels recognition virtual collaborative spaces virtual environment emotional attention virtual palpation sketch book design animation and avatar face recognition

Creating Stellar Lessons with Digital Tools 2011-03-15

every day millions of people carry a sophisticated camera in their pocket their iphone many people use their iphones to take snapshots but few realize the power of their phone s camera after all it only has one button the iphone photography bookshows you how to harness the full potential of your iphone s camera this richly illustrated 4 color book teaches you how to manipulate and publish images straight from your iphone without the hassle of memory cards connection cables or complex desktop photo editing tools author allan hoffman begins by explaining fundamentals of great iphone photography and how to use the essential iphone editing apps you ll learn tips and tricks for composition focusing lighting and the other unique challenges of the iphone you ll also learn how to instantly share photos on flickr and create your own photoblog those looking to get the most out of their iphone s camera and make remarkable photos with iphone apps just need to open the iphone photography book

Transactions on Computational Science XVIII 2015-04-24

sabine stübler compares different proteasome isoforms and subtypes in terms of their transport and active site related parameters applying an existing computational model in a second step the author extends this model to be able to describe the influence of proteasome inhibitors in in vitro experiments the computational model which describes the hydrolysis of short fluorogenic peptides by the 20s proteasome is calibrated to experimental data from different proteasome isoforms using an approximate bayesian computation approach the dynamics of proteasome inhibitors are included into the model in order to demonstrate how to modulate the inhibitor s transport parameters for strong or isoform specific inhibition

Create Great iPhone Photos
