arranged chronologically by date of publication the extracts have been carefully chosen to be suitable for use at intermediate to upper intermediate level the texts are accompanied by a short biography of each author including their literary characteristics and achievements comprehension questions on author and text discussion questions to encourage free expression language extension exercises covering grammar vocabulary word building idioms and phrasal words composition work and role plays perhaps the single most influential work of general linguistics published in this century leonard bloomfield's language is both a masterpiece of textbook writing and a classic of scholarship intended as an introduction to the field of linguistics it revolutionized the field when it appeared in 1933 and became the major text of the american descriptivist school over a period of over forty years geoffrey leech has made notable contributions to the field of literary stylistics using the interplay between linguistic form and literary function as a key to the mystery of how a text comes to be invested with artistic potential in this book seven earlier papers and articles read previously only by a restricted audience have been brought together with four new chapters the whole volume showing a continuity of approach across a period when all too often literary and linguistic studies have appeared to drift further apart leech sets the concept of foregrounding also known as defamiliarization at the heart of the interplay between form and interpretation through practical and insightful examination of how poems plays and prose works produce special meaning he counteracts the flight from the text that has characterized thinking about language and literature in the last thirty years when the response of the reader rather than the characteristics and meaning potential of the text itself have been given undue prominence the book provides an enlightening analysis of well known as well as less well known texts of great writers of the past including keats shelley samuel johnson shaw dylan thomas and virginia woolf

every language has been influenced in some way by other languages in many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from russian japanese and arabic respectively in other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language for example english s structure has been shaped in such a way by the effects of norse french latin and celtic though english is not alone in its openness to these influences any features can effectively be transferred from one language to another

over a period of over forty years geoffrey leech has made notable contributions to the field of literary stylistics using the interplay between linguistic form and literary function as a key to the mystery of how a text comes to be invested with artistic potential in this book seven earlier papers and articles read previously only by a restricted audience have been brought together with four new chapters the whole volume showing a continuity of approach across a period when all too often literary and linguistic studies have appeared to drift further apart leech sets the concept of foregrounding also known as defamiliarization at the heart of the interplay between form and interpretation through practical and insightful examination of how poems plays and prose works produce special meaning he counteracts the flight from the text that has characterized thinking about language and literature in the last thirty years when the response of the reader rather than the characteristics and meaning potential of the text itself have been given undue prominence the book provides an enlightening analysis of well known as well as less well known texts of great writers of the past including keats shelley samuel johnson shaw dylan thomas and virginia woolf
