the canon eos rebel t8i also known as the eos 850d or kiss x10i in some markets is a 24mp dslr camera that is compatible with the company s ef and ef-s mount lenses it has an optical viewfinder but it also has a usable and responsive touchscreen interface and lives view experience that s a match for the company s mirrorless camera options for much of the world shifting consumer preferences towards mirrorless cameras have left dslrs looking like relics of history though europe and the americas remain holdouts last year europeans still bought about 1.4 dslrs for every mirrorless camera sold while in the americas the ratio was even higher at 1.7:1 so why might you consider a dslr in our increasingly mirrorless world some photographers still prefer dslrs for their crisp lag-free through-the-lens viewfinders and there s a much wider array of lenses available to dslr shooters without the need for adapters the guide discussed in detail all of the basic settings in the latest camera that are essential for professional photographers and individuals who just want to get more out of their pictures by using advanced cameras like the canon camera
