

Free pdf Geography by khullar .pdf

over the last three decades tripura the smallest of north east indian states surrounded on three sides by bangladesh was caught in the vortex of highly patterned militant violence deadly ethnic conflicts and planned destruction of thousand year old harmonious and peaceful coexistence of tribal and non tribal people of the state since the day the tnv took to arms the surfeit of tribal insurgencies in tripura is marked by brutal civilian massacres abduction of innocent citizens ambushes on security forces large scale extortions and a ruthless ethnic cleansing perpetrated on unarmed non tribals by the national liberation front of tripura and the all tripura tiger force two banned underground organizations the armed insurrections in tripura at varied levels and colors often abetted by narrow political interest were marked not only by serious threat to human life and civilian security but also by destruction of properties on a colossal scale the blood spilling xenophobic tribal militancy sought homogenization of the land and the subsequent fall out also caused wide ethnic fissures between the majority bengalis and minority indigenous tribal people one of the important features of the orgy of violent campaigns was that it had taken ominous proportions with the forces inimical to india coming to play the key role to help and support the underground elements the book the eyewitness tales from tripura s ethnic conflict creates a matrix of hard facts and figures with personal experiences and stories of witnesses from a cross section of people common men police and security officials administrators militants journalists businessmen victims of militancy et al the book records in cold letters and with appropriate interpretations the painful litany of grisly crimes in the name of insurgency and how and why these happened illustrations 16 b w photographs a text book on geography this captivating chronicle delves into the untold story of a tribe of people who have played a significant role in mountain exploration and climbing in the himalayas situated in northern india darjeeling was developed as a colonial retreat by the british in the early 1830s and soon became famous for its tea gardens attracting locals from around the region nepal and tibet in search of work when darjeeling became the jumping off point for early himalayan expeditions workers from the sherpa and bhutia communities soon established themselves as the preferred high altitude porters bringing fame entwined with tales of valor courage and sacrifice to the city these are some of their stories over the course of a decade authors nandini purandare and deepa balsavar conducted a series of interviews with sherpas from darjeeling as well as their family members descendants friends and contemporary climbers headstrap weaves a vivid tapestry of this particular sherpa community giving them the recognition in mountaineering literature that they deserve debut author wientge tackles the uncomfortable but all too relatable subject of female body hair and self esteem with this sweet and charming novel in the tradition of judy blume somewhere between global and local the nation still lingers as a concept national art histories continue to be written some for the first time while innovative methods and practices redraw the boundaries of these imagined communities narratives unfolding considers the mobility of ideas transnationalism and entangled histories in essays that define new ways to see national art in ever changing nations examining works that were designed to reclaim or rethink issues of territory and dispossession home and exile contributors to this volume demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations essays showcase revealing moments of modern and contemporary art history in canada egypt iceland india ireland israel palestine romania scotland turkey and the united arab emirates paying particular attention to the agency of institutions such as archives art galleries milestone exhibitions and artist retreats old and emergent art cities including cairo dubai new york and vancouver are also examined in light of avant gardism cosmopolitanism and migration narratives unfolding is both a survey of current art historical approaches and their connection to the source art making and art experience happening somewhere this thematical issue presents to readers the results of engineering research on the strength of engineering materials and structural integrity including numerical analysis of heat and mass transfer phenomena in engineering systems the methods and research results in the area of materials physics and actual examples of applications of approaches of computational materials science are presented in a separate chapter the publication will be helpful to specialists and researchers in materials science and machinery this monograph presents a specific experience of modernity within the context of indian dance by looking at the transcultural journey of indian dancer choreographer uday shankar 1900b 1977d his popularity in europe and america as an oriental male dancer in the first half of the 20th century and his worldwide recognition as the ambassador of indian culture are brought into a historiographical perspective within the cultural and social reforms of early twentieth century india by exploring his artistic journey beyond india in the period between the two world wars and his experience of dance making presentational technique and representation of india through various phases of his life a path is forged to understanding the emergence of modernity in indian dance this latest edition of the pearson general studies manual continues to provide exhaustive study material for the general studies paper of the upsc civil services preliminary examination this student friendly book has been completely revised thoroughly updated and carefully streamlined and is strictly exam centric in this new edition a large number of new boxes and marginaliaâ with additional and relevant informationâ have been added to provide cutting edge information to the aspirant readers will find that important facts and information have been presented in the form of well structured tables and lists contributed articles based on environmental and socioecological studies in india this volume provides a contemporary overview of new strategies for traditional medicine development it emphasizes the importance of cataloging ethnomedical information determining the active principles and examining the genetic diversity and range of actions of traditional medicines it discusses the challenges of using traditional medicines for papers presented to a national seminar on perspectives on the eighth schedule held at the centre of linguistics and english school of languages jawaharlal nehru university august 5 6 1993 this edited book provides a platform for knowledge sharing in all areas related to the rivers sediment and hydrological extremes it explains the hypothesis that river flow and sediment transport are intimately linked to erosion scour and

sediment deposition sediment transport erosion and deposition are driven by local base level changes and are highly variable in space and time these concepts have serious implication for understanding the recent development of the river sediment and hydrological extremes the natural hazards posed by hydrologic events and river systems depend on the uncertainty of hydrological events this ability is affected by change in climatic conditions climate change studies have revealed that the frequency of extreme weather phenomena with increasing damage to human assets has gradually grown worldwide as a consequence rainfall events concentrated in time and space are expected to lead to serious local flooding and sediment transport in many parts of the world floods are remarkable hydro meteorological phenomena and forceful agents of geomorphic evolution in most physical geographical belts and from the viewpoint of human society among the most important environmental hazards according to the indian environment agency floods rank as number one on the list of natural disasters in india over the past decade this book is an attempt to fill the gap in literature and bring forth evidence based latest research about precise estimation of erosion and scour which is essential to reduce the hazards the book explains that lack of preparedness and appropriate adaptation strategy makes people more risk prone it highlights the vulnerability in south asia region about the impacts of flood sediments and river hazards because a large portion of its population depends on sensitive sectors like agriculture and forestry for livelihoods and several other reasons the book is relevant for academicians researchers and students of disaster management hydrology and ecology this issue of thoracic surgery clinics guest edited by dr felix fernandez is devoted to quality in thoracic surgery dr fernandez has assembled expert authors to review the following topics risk adjustment and performance measurement for lung cancer resection risk adjustment and performance measurement for esophageal cancer resection oncologic quality indicators in thoracic surgery national quality forum metrics for thoracic surgery volume outcome relationships in thoracic surgery failure to rescue in thoracic surgery quality and cost in thoracic surgery patient reported outcomes in thoracic surgery database audit in thoracic surgery european society of thoracic surgeons risk score international database collaboration in thoracic surgery hospital readmissions following thoracic surgery and more with the rise of virtual reality augmented reality the internet of things and more customers are more engaged more involved and easier to reach than ever while being inundated with increasing amounts of marketing material this straightforward guide takes you through these new technologies and shows how to leverage them to reach new markets rather than centering on the well known collections in western european and north american museums collecting asian art turns to museum collections of asian art in central europe which emerged from the late 19th century onwards highlighting the dimensions of central european connectedness this volume explores how these collections evolved and changed under changing cultural and political conditions from the pre world war i to the post world war ii periods with a primary focus on collections of east asian south asian and west asian art in vienna prague berlin warsaw kraków budapest and ljubljana it outlines the transregional connections and networks that gradually developed collecting asian art locates asian art across the twentieth century in central europe via discourse and ideology and discusses key collections and the way individual collectors built their networks it thus explores transregional connections that developed through collecting activities and strategies in the prewar interwar and postwar eras contributors also examine the personal connections between a group of indologists from postwar prague and modernist indian artists from the early 1950s to the 1980s and also discuss the systematic archiving of east asian art collections in slovenia a concluding conversation looks at colonisation and decolonisation from a broader perspective by approaching it through recent art historical discussions on the global dimensions of modernism by defining the region through its external relationships and its entanglements with regions across asia rather than as a self contained unit the contributions in this volume outline how these transregional connections and networks evolved and changed over time thus highlighting their singularity in comparison to developments in western europe based on recent research collecting asian art reveals neglected sources while reinterpreting well known ones this book provides a thorough and up to date overview of the aryl hydrocarbon receptor ahr and its unique dual role in toxicology and biology the coverage includes epigenetic mechanisms gene expression reproductive and developmental toxicity signal transduction and transgenic animal models featuring an internationally recognized team of authors at the forefront of ahr research this resource provides a comprehensive reference for readers interested in understanding the full spectrum of ahr from basic concepts toxicology analysis and models to polymorphism and related diseases social inequities in cancer is a compendium of articles that identify barriers and metrics on the topic of modifiable and unnecessary cancer inequalities social inequities have long been recognised as a strong contributing factor in health and cancer inequalities for the past several decades despite progress in cancer treatment cancer incidence mortality and survival vary markedly between and within countries globalisation greater life expectancy emerging analytical technologies and the scalability of big data have revolutionized the vantage point from which social inequities can be studied the focus of these articles is inequalities as they relate to cancer with the inequalities ranging from the community to the global scale disclaimer where authors are identified as personnel of the international agency for research on cancer world health organization the authors alone are responsible for the views expressed in this article and they do not necessarily represent the decisions policy or views of the international agency for research on cancer world health organization political biography of bhagat singh 1901 1931 indian freedom fighter those were the best days of our lives for aadi srini ambi td miru and kajo the twentieth anniversary reunion of their batch from iim calcutta provides the perfect opportunity to set aside their everyday anxieties and relive the heady days of their youth but things begin to go awry when ex lovers reunite old grudges resurface and longheld secrets come tumbling out as they navigate an eventful weekend in goa packed with expected nostalgia and unexpected drama what becomes increasingly clear is that while friends are fallible friendships are forever sparking with wit warmth and the easy craft that has marked swati kaushal s bestselling novels a few good friends is a refreshing nuanced take on friendship love and this crazy thing called life first in the series of books detailing wartime operations of the indian air force iaf it provides a history of the air component of a war triggered by

pakistan s invasion of kashmir in 1965 based on interviews with iaf war veterans squadron diaries and never before published photographs including gun camera photos the book is very valuable in understanding the deployment of air power in the twentieth century this book provides the latest recommendations for ultrasound examination of the entire urogenital system particularly in the male the coverage encompasses the role of ultrasound in imaging of disorders of the kidneys urinary tract prostate seminal vesicles bladder testes and penis including male infertility disorders in addition detailed consideration is given to intraoperative and interventional ultrasound and recently developed ultrasound techniques each chapter defines the purpose of and indications for ultrasound identifies its benefits and limitations specifies the technological standards for devices outlines performance of the investigation establishes the expected accuracy for differential diagnosis and indicates the reporting method most of the recommendations are based on review of the literature on previous recommendations and on the opinions of the experts of the imaging working group of the italian society of urology siu and the italian society of ultrasound in urology andrology and nephrology sieun the book will be of value for all physicians involved in the first line evaluation of diseases of the renal urinary system and male genital disorders light plasmonics and particles focuses on the fundamental science and engineering applications of light scattering by particles aerosols and hydrosols and of localized plasmonics the book is intended to be a self contained and coherent resource volume for graduate students and professionals in the disciplines of materials science engineering and related disciplines of physics and chemistry in addition to chapters related to fundamental concepts it includes detailed discussion of different numerical models experimental systems and applications in order to develop new devices processes and applications we need to advance our understanding of light matter interactions for this purpose we need to have a firm grasp of electromagnetic wave phenomena and absorption and scattering of waves by different size and shape geometrical objects in addition understanding of tunneling of waves based on electron and lattice vibrations and coupling with the thermal fluctuations to enhance near field energy transfer mechanisms are required for the development of future energy harvesting devices and sensors reviews the fundamental science available computational tools experimental systems and a wide range of applications of plasmonics connects the cross cutting science of the physics of electromagnetic light scattering by particles plasmonics and phononic interactions at the electronic molecular and lattice levels of materials reviews applications of light matter interactions of particles aerosols hydrosols and localized plasmonics contributed articles the state of the art in fluvial hydrodynamics can be examined only through a careful exploration of the theoretical development and applied engineering technology the book is primarily focused since most up to date research findings in the field are presented on the research aspects that involve a comprehensive knowledge of sediment dynamics in turbulent flows it begins with the fundamentals of hydrodynamics and particle motion followed by turbulence characteristics related to sediment motion then the sediment dynamics is analysed from a classical perspective by applying the mean bed shear approach and additionally incorporating a statistical description for the role of turbulence the work finally examines the local scour problems at hydraulic structures and scale models it is intended to design as a course textbook in graduate research level and a guide for the field engineers as well keeping up with modern technological developments therefore as a simple prerequisite the background of the readers should have a basic knowledge in hydraulics in undergraduate level and an understanding of fundamentals of calculus
