APOCALYPSO - John O'Loughlin,2022-03-02 This revelatory project carries on from earlier ones of a similar aphoristic nature by the author the task of highlighting the axial distinctions between Social Theocracy and Social Democracy, and is more terminologically exacting than ever before, with what Mr O'Loughlin holds to be well-nigh irrefutable conclusions.

The Apocalypso Quartet John O'Loughlin,2022-05-12 Besides the book entitled 'Apocalypso - The New Revelation', this project also includes 'At the Crossroads of Axial Divergence', 'Opti-mystic Projections' and 'Unflattering Conclusions', all of which do further justice to the ideological philosophy of Social Transcendentalism and its Social Theocratic antipathy to Social Democracy.

Television and the Quality of Life Robert Kubey,Mihalyi Csikszentmihalyi,2013-12-02 Employing a unique research methodology that enables people to report on their normal activities as they occur, the authors examine how people actually use and experience television -- and how television viewing both contributes to and detracts from the quality of everyday life. Studied within the natural context of everyday living, and drawing comparisons between television viewing and a variety of other daily activities and leisure pursuits, this unusual book explores whether television is a boon or a detriment to family life; how people feel and think before, during, and after television viewing; what causes television habits to develop; and what causes heavy viewing -- and what heavy viewing causes -- in the short and long term. *Television and the Quality of Life* also compares the viewing experience cross-nationally using samples from the United States, Italy, Canada, and Germany -- and then interprets the findings within a broad theoretical and historical framework that considers how information use and daily activity contribute to individual, familial, societal, and cultural development.

Problem Solving in a Foreign Language Lena Heine,2010 Although Content and Language Integrated Learning (CLIL) is a popular teaching method, research on CLIL has nearly exclusively focused on aspects of language learning. Besides that, we are still lacking any cognitively well-grounded theory about the special features of contexts in which the focus is on content learning, but in which a foreign language is used as the medium of communicating information. This book re-examines the basis for CLIL from a cognitive perspective and investigates how the use of a foreign language as a working language influences the processing of content. It summarizes findings from cognitive psychology on thinking, problem solving and conceptual processing, and integrates them with models of language-specific mental activities such as speech

processing and text composition. This provides a theoretically well-grounded basis for the understanding of the special features of CLIL, and promotes a Cognitive Linguistic perspective on CLIL pedagogy. The theoretical considerations form the basis for an empirical study that offers the first insights into what CLIL learners actually do when they solve content-focused tasks while using an L2. Through spontaneous verbalization of thought, detailed verbal protocols were elicited and analysed into language and content focused cognitive processes. The analysis shows that both language and conceptual thought interact closely and that a focus on language in general has positive effects on the processing of semantic content; the use of an L2 as working language can enhance this effect. Additionally, the study offers a thorough reflection and new perspectives on verbal protocols as research tools, in particular in L2 contexts.
