Searching for a 'Principle of Humanity' in International Humanitarian Law 1917 back in 2012

when the planets aligned the earth was too laden to support itself and it had sunk slightly in the atmosphere causing the planet to become cold and dark resulting in more fear and chaos on the planet my name is mayan aries i work for the ancient mayans in telecommunication and broadcast frequencies i was awakened in 2011 by these divine spirits whom i communicate with spiritually as well as telepathically they have always watched over the planet to ensure that it remains in universal balance these beings were responsible for the creation of the first solar calendar and were able to successfully forecast many future events as a result of these detailed solar planetary energy calculations they were also responsible for the creation of the seven wonders of the world they have been telepathically connected to many unaware humans as new technology was invented it is with the guidance of these divine beings that humans continue to create and evolve it is in the realm of creation when you are able to quiet the traffic of your mind you may be able to pick up a thought or suggestion from an alternate dimension most will claim this idea as their own however i believe otherwise this is the story of my alien colleague commander tom i met her while working for the ascended masters she too was a human awakened to participate in the spiritual ascension of rising from the 3rd dimensional soul to higher frequencies activating her higher consciousness she had already been recruited by the ascended masters who were building a new future and would be forming a new system of government she was a quantum jumper working with the aliens on the re stabilization of the planet my name is commander tom i was given this name during my ascension my job had always been in technology i worked to assist the field technicians with installation of satellite and wireless frequencies back in 2011 i was on a field mission in our nations capital i was researching the microwave towers we had hoped that we could increase their power to transmit and receive signals in greater distances in an effort to conserve satellite space we were investigating the effects of the corrosion produced by the metal towers on the environment we were also researching the frequency exchange between these devices on the surrounding environment which we felt was out of balance by observing the natural habitat surrounding our equipment we were also considering solar powered earth stations and were trying to develop new methods of transmission that did not utilize our existing satellite frequencies and bandwidths we were hoping to create earth stations that were able to simulate the satellite programming to send local transmissions this would increase the availability of space providing an increase in local and regional programming leaving the clark belt more space for future development of space communications and help to resolve the political pressure on the telecommunications business it was an exciting time in technology the future possibilities were infinite i felt obligated to assist in not only providing access to this technology but to also take responsibility for the damages it had caused the planets habitat we needed to ensure that our man made structures did not destroy the very environment that enabled us to survive as a human race i had a lot on my mind every day i wondered if the technology was good for us or if it would harm us in the future by creating energy fields that our human body suit would be unable to navigate around then i had an accident which transformed my life i met and joined the ascended masters to aid in the preservation and evolution of the planet for the 2nd millennium this is the story of the start of my journey

Unique Sacrifice of Imam Hussain for Humanity 1898 this work is a critical analysis of karl barth s unique adoption of the concepts anhypostasis and enhypostasis to explain christ s human nature in union with the logos which becomes the ontological foundation that barth uses to explain jesus christ as very god and very man the significance of these concepts in barth s christology first emerges in the göttingen dogmatics and is then more fully developed throughout the church dogmatics barth s unique coupling together of anhypostasis and enhypostasis provides the ontological grounding flexibility and precision that so uniquely characterizes his christology as such barth expresses the word became flesh as the revelation of god that flows out of the coalescence of christ s human nature with his divine nature as the mediation of reconciliation this ontological dynamic provides the impetus for barth s critique of chalcedon s static definition of the union of divine and human natures in christ from which barth transitions to an active definition of these two natures not only does anhypostasis and enhypostasis explain the dynamic union between the divine and human natures in christ but also the dynamic union between jesus christ and his church which reaches its apex in the reconciliation of humanity with god in christ the ontological foundation of anhypostasis and enhypostasis in christ s union with his church explains the importance of the royal man in understanding genuine human nature the exaltation of human nature and the sanctification of human nature

Goethe's Message for the 21st century: "Islam is the rescue for Humanity" 1922 from a christian perspective it could well be said that humanity a good gift of god is being undermined by the technology and thought patterns and practices of contemporary western culture in response to what is seen as an attack many books have been written on the harm of these technologically driven practices these articles and books focus on what is wrong with euthanasia with surrogate motherhood with the denial of the male female difference and so forth yet to make a compelling cultural witness it is more important for christians to know what is right and essential that they be able to articulate the positive why do babies matter what is the goodness embedded in being made male and female how can one approach death in a godly manner we need in other words to be able to give an account of god s yes 2 cor 1 20 the hope that is within us 1 peter 3 15 in this collection of essays an ecumenical group of scholars of diverse perspectives discuss these and other important questions in order to help discern what is good for humanity with contributions by phillip cary donna freitas paul hinlicky edith m humphrey patrick lee gilbert meilaender nancey murphy

Proceedings of the Trustees ... from Their Original Organization on the 8th February, 1867 2019 today much preaching and teaching throws people back upon themselves to earn their relationship with god and to try to achieve by their own efforts the kind of person that they ought to be in the claim of humanity in christ alexandra radcliff counters the torrances critics to show the significance of their controversial understanding of salvation for the interface between systematic and pastoral theology radcliff then constructively extends the implications of the torrances work to a liberating doctrine of sanctification the christian life is conceived as the free and joyful gift of sharing by the spirit in the son s intimate communion with the father whereby we are turned out of ourselves to reflect the reality of who we are in christ
