annotative scaling etc in intermediate cad courses in recognition of the diverse career interests of our students technical drawing 101 includes projects in which students create working drawings for a mechanical assembly as well as for an architectural project we include architectural drawing because our experience has shown that many if not most first semester drafting students are interested in careers in the architectural design field and that a traditional technical drawing text which focuses solely on mechanical drawing projects holds little interest for these students the multidisciplinary approach of this text and its supporting materials is intended to broaden the appeal of the curriculum and increase student interest and it is hoped future enrollments
